Train your brain

LOGICAL TABLES

Description

The purpose of this activity is to structure given information by organizing it into a table, to find a quick solution.

Learning Objectives

To graphically represent the situation described in the task, which will help to structure thoughts and find a quick solution.

Time Needed
20 min

Learning Setting
Individual or group activity

Materials Required
Handouts with the tasks, pens

Step By Step Guidance

Read the instructions carefully.
Organize the information given in a table. The beginning is done for you.
Think logically and fill in the missing information.
Answer the questions with the information derived from your table.

Expected Results

- You train data visualization.
- You train logic
- You discover how you can make a task simpler, by delivering it in another form (table), and solutions will be obvious.
- You improve reasoning and critical thinking skills.

Practical Tips

The difficulty of the task may change, depending on the number of objects and categories. The activity can be done individually or in a small group - in the latter way, it should take less time.
